Our eKOfreshment Program

- In November 2009, The Coca-Cola Company set an ambitious global goal to **phase-out the use of HFCs in all new cold drink equipment purchases by 2015**
- In May 2011, TCCC's Operating Committee confirmed the adoption of **CO₂ as the HFC-free refrigerant of choice** for all new equipment purchases
- By the end of 2012, we'll exceed the **800,000 HFC-free** units placed globally

Refrigerants, Naturally!

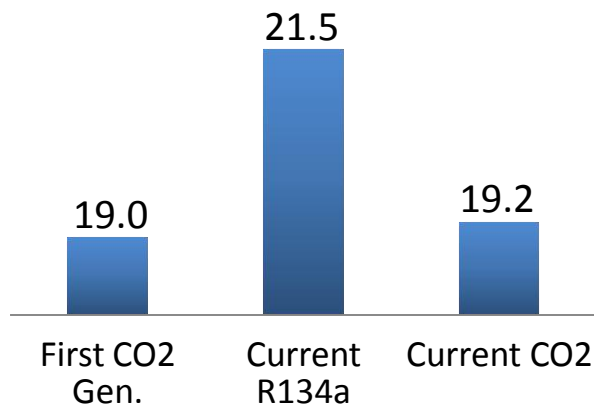

CO₂ Equipment Performance is Improving

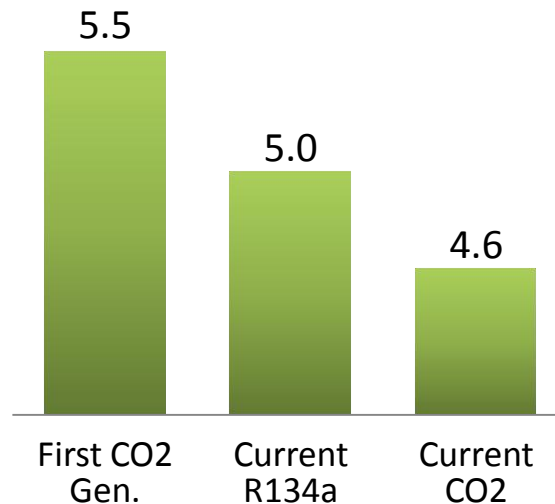

**Average Cooling Performance:
Pull Down Time**

KO Spec = 24 hrs.

**Average Energy Performance:
KWhr/day**

Sources: China and Brussels TCCC Labs, and suppliers in-house results
Averages calculated for single door coolers between 500Lit and 600Lit capacity, under "D" conditions

Refrigerants, Naturally!

Action Towards Our 2015 Goal

- In 2011, The Coca-Cola Company executed a CO₂ compressor supply agreement with Sanden Japan enabling us to significantly increase the purchase of CO₂ compressors for our equipment at prices that deliver better value to our business
- We are focusing on two key areas to accelerate adoption:
 - Improving components' global supply chain
 - Delivering servicing and maintenance trainings for our technical teams
- Within **Refrigerants Naturally!** and the **Consumer Goods Forum**, we are working with other corporations to accelerate the industry adoption of HFC-free technologies
