# Field experience

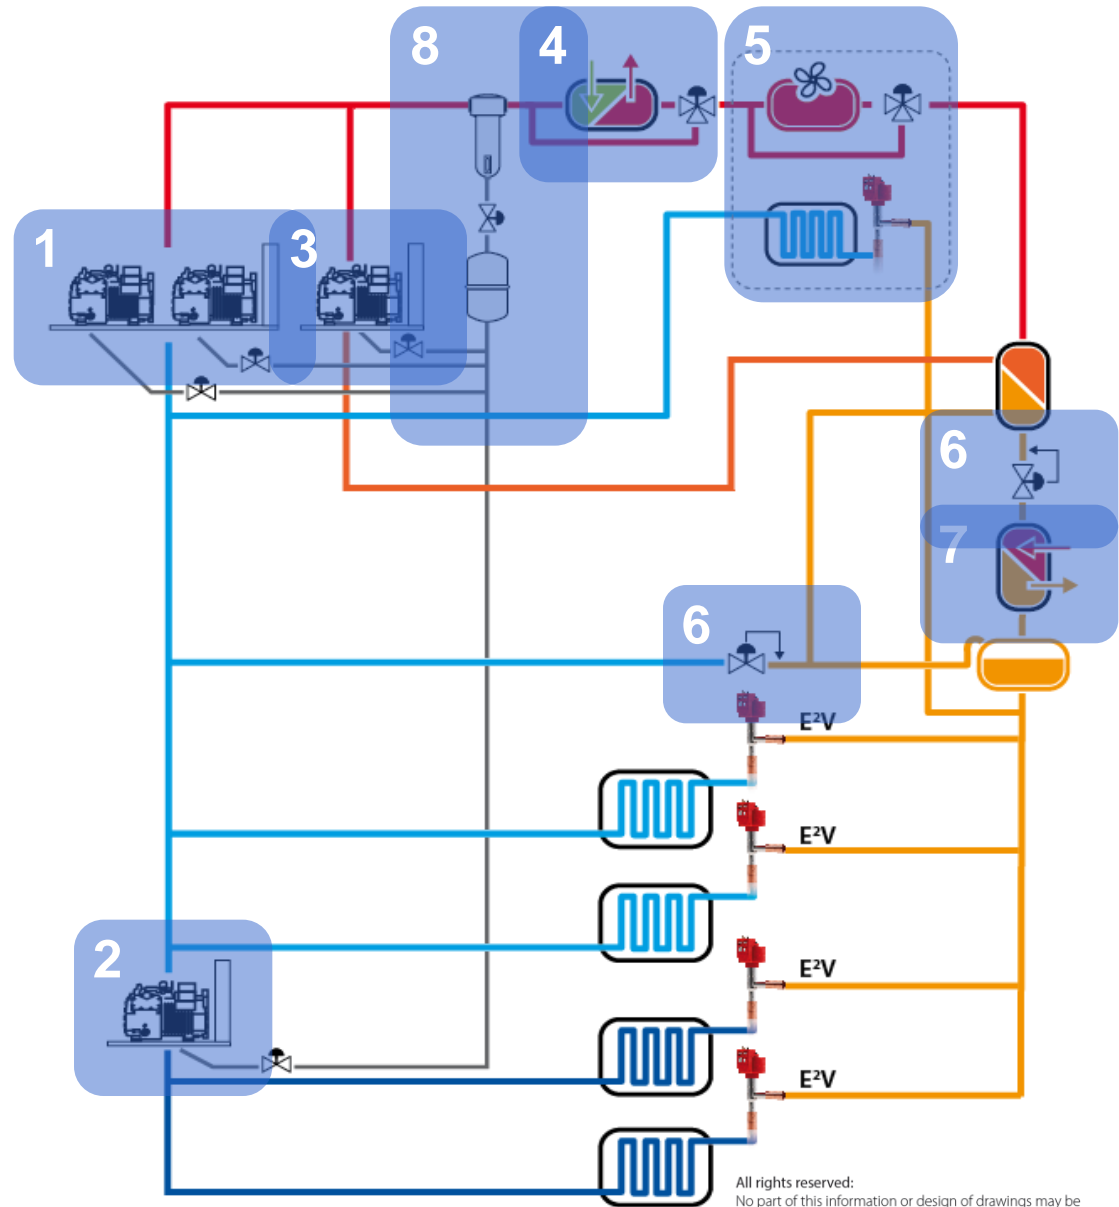

Integrated compressor rack for medium-sized supermarket in southern Germany  
Refrigeration, air conditioning & heat recovery loads

2 - MT : 60 kW  
1 - LT : 8 kW  
1 - Par : 12 m<sup>3</sup>/h  
1 - H/R : 75 kW  
1 - AC : 30 kW

# Field experience

1. MT Compressors
2. LT Compressor
3. Parallel Compressor
4. Heat recovery heat ex.
5. Gas Cooler & “false load”
6. Transcritical & flash gas valves
7. Air conditioning heat ex.
8. Oil return

# Integration

Complete control of the entire unit on one single device

- Lower installation costs/ space
- Faster commissioning
- Increased usability (one point of access)
- Improved efficiency

# Integration

## How to divide total energy consumption between REF – AC – HR?

One unit providing REF+AC+HR

Compressor power consumption [kW]

- $P_{MT}$  : Medium temperature compressors
- $P_{LT}$  : Low temperature compressors
- $P_{PC}$  : Parallel compressors
- $P_{GC}$  : Gas cooler

Heat transfer

- $Q_{AC}$  : Air conditioning heat
- $Q_{HR}$  : Heat recovery heat

# Integration

## How to divide total energy consumption between REF – AC – HR?

Site status reading: main variables, energy consumption, heat transfer  
Real time COP calculation, division of power consumption

Rack Controller

$Q_{HR}$

$Q_{AC}$

$P_{MT}$

$P_{LT}$

$P_{PC}$

$P_{GC}$

$P_{HR}$   
 $P_{AC}$   
 $P_{REF}$

# Integration

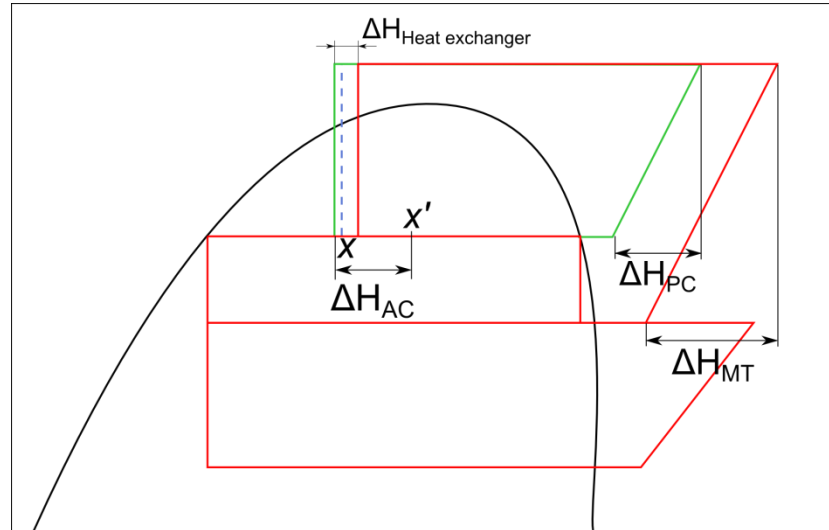

Temperatures  
Pressures  
Comps data

Enthalpies  
Qualities

$COP_{HR}$   
 $COP_{AC}$   
 $COP_{REF}$

$P_{HR}$   $P_{AC}$   
 $P_{REF}$

## Air conditioning mode

Higher quality of vapour

Mass refrigerant flow  $\dot{m}_{AC}$

## Heat Reclaim mode

Higher gas cooler pressure

Higher quality of vapour

$$\frac{COP_{HR ON}}{COP_{HR OFF [T]}} = \frac{P_{HR ON}}{P_{HR OFF}}$$

# Warm Climates

## PARALLEL COMPRESSOR

Receiver pressure control  
Activated with sufficient flash gas  
Flash gas valve synchronisation

Higher efficiency

- High gas cooler pressure
- AC load
- Heat recovery

Higher efficiency at higher outside temperature

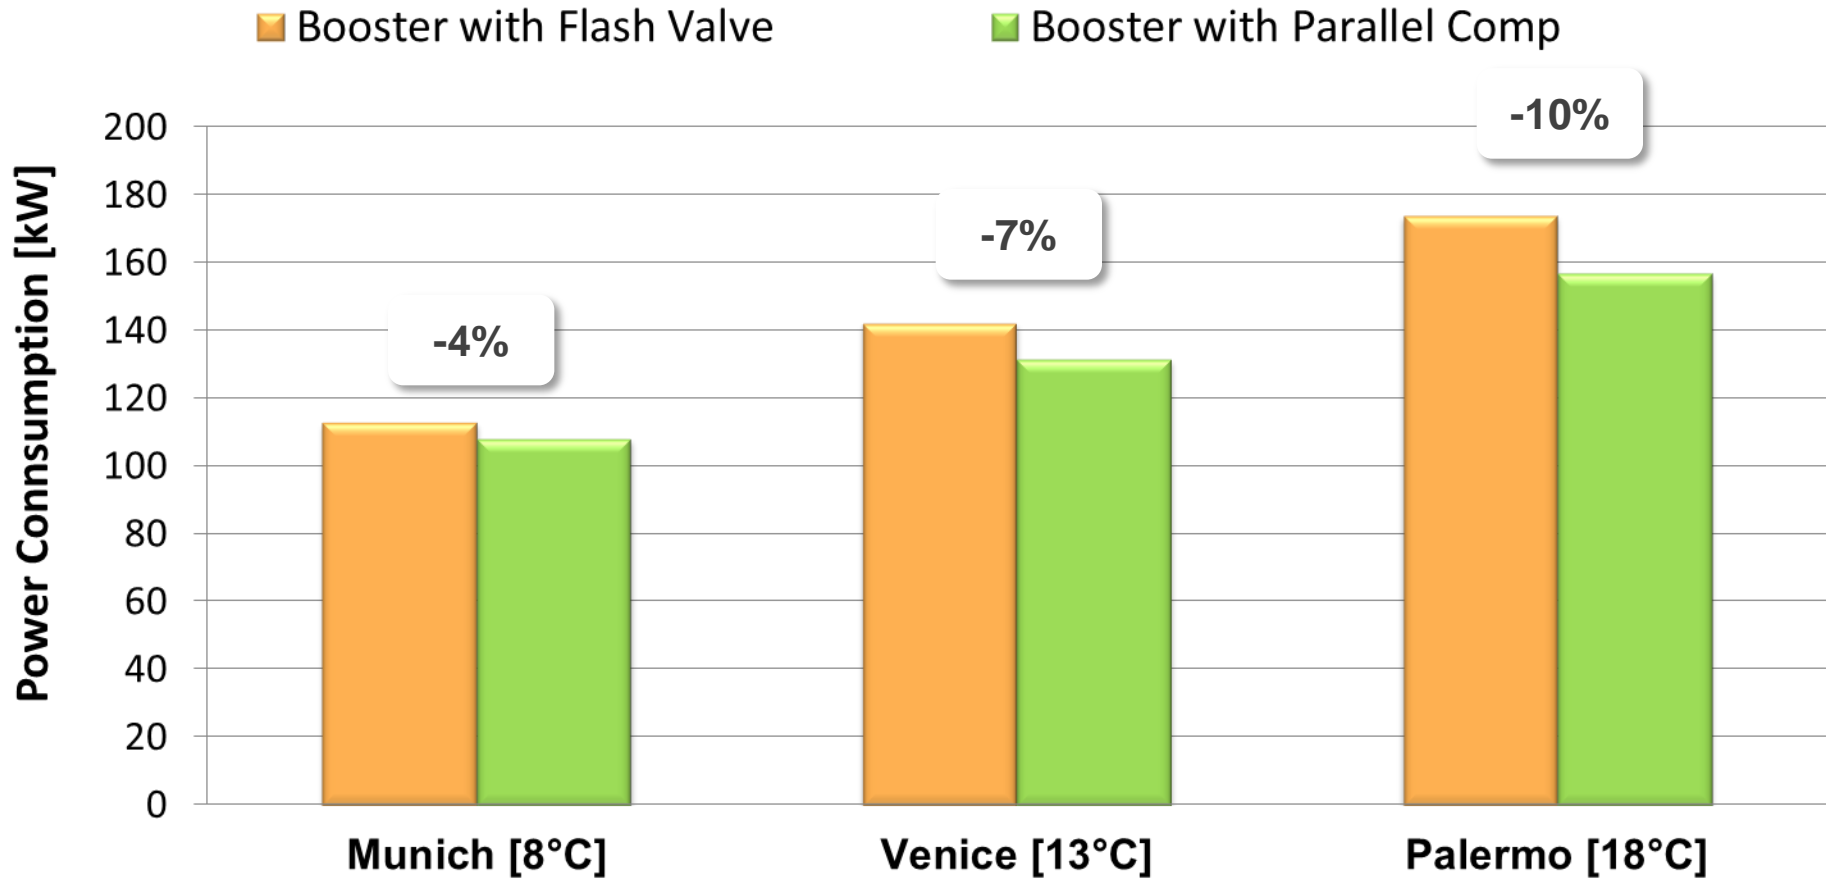

# Warm Climates

## Power consumption vs Temperature

# Warm Climates

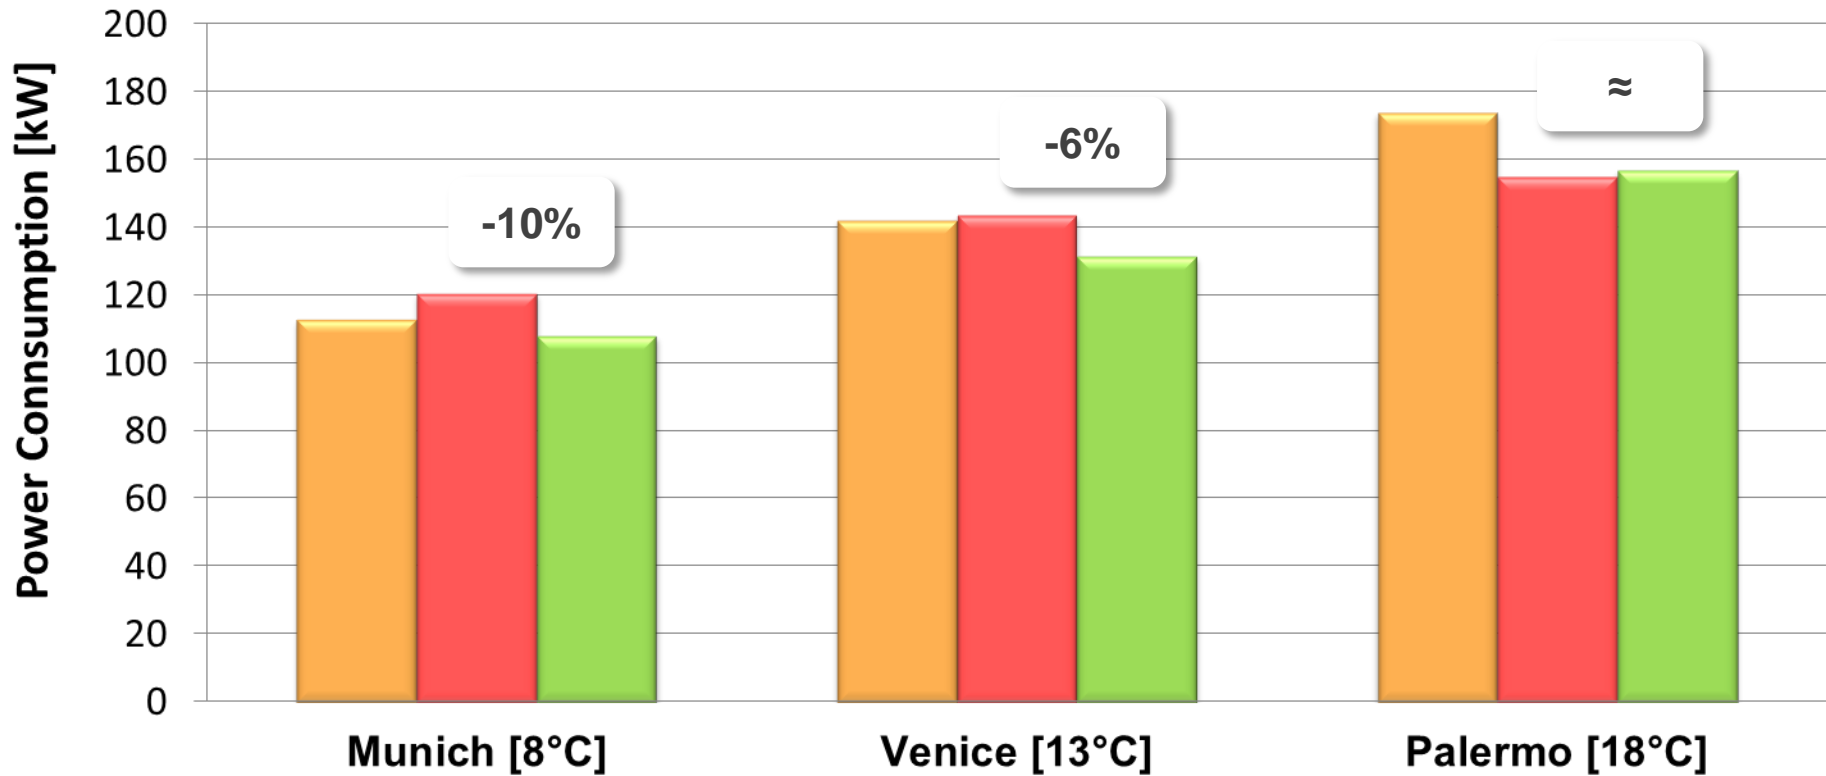

## Energy consumption comparison

# Warm Climates

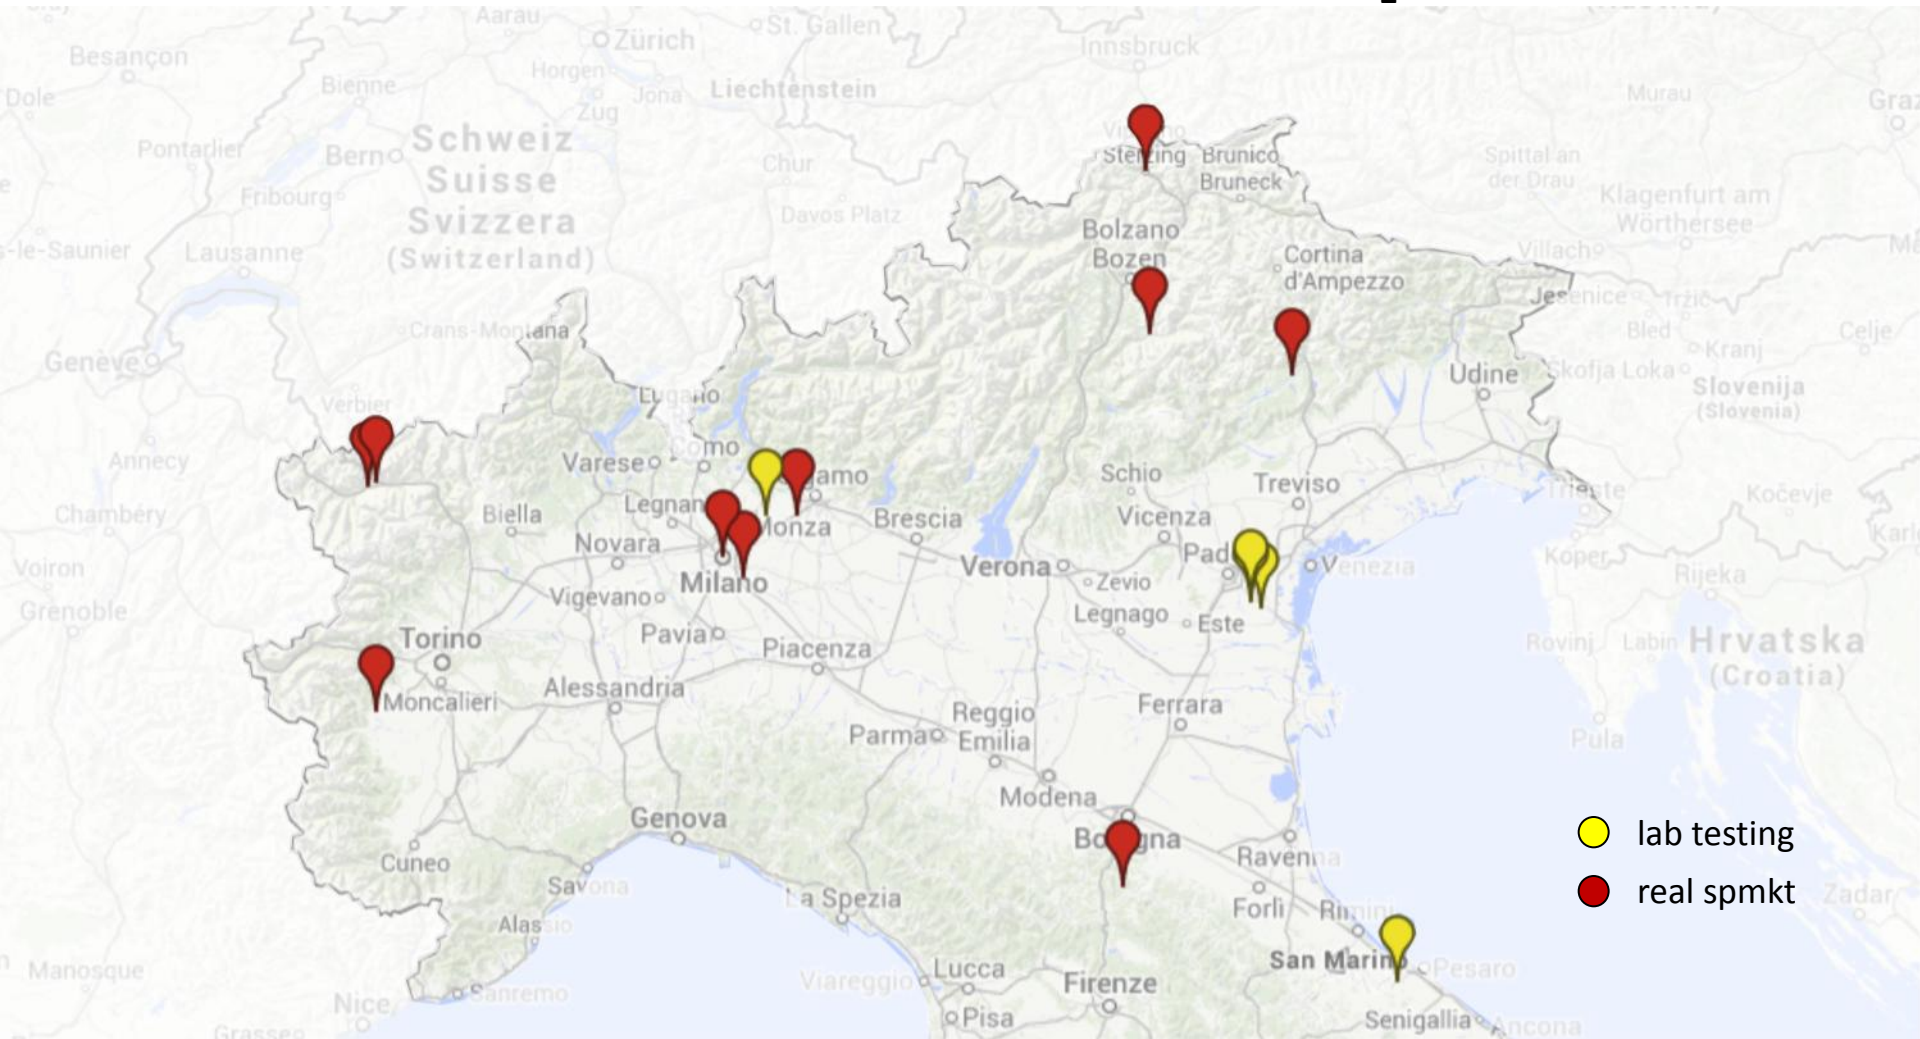

## Energy consumption comparison

Booster with Flash Valve Cascade R134a/CO2 Booster with Parallel Comp
