## **Heat Pump Workshop**

**Sydney, 7 May 2018**

# Concept & plan

Round table group discussions towards an action plan to gather industry support for water-heating heat pumps using natural refrigerants in Australia.

## Steps:

**1. Background: presentations on market and technology options (30 min)**

**2. Group discussions / brainstorming (1hour)**

- Business case for heat pumps in Australia
- Existing barriers
- Recommended actions

# Part I: setting the scene

Business case in Australia (A2EP Report)

Technology options: efficiency & performance

- Mayekawa
- MHI
- Johnson Controls

**HIGH TEMPERATURE HEAT PUMPS  
for the Australian food industry:**

*Opportunities assessment*

August 2017

# Part II: group discussion

## Participatory leadership method

3 topics/ rounds of discussion (15min each):

1. Business case: establish size of opportunity/ market
2. Determine existing barriers
3. Recommendations (solutions)

All participants change table after each round, only 1 host remain per table (to share key insights from each round and summarise conclusions)

Each round ensures participation of all participants, sharing experience, ideas, etc.

Final step: summarise conclusions. Report from session to follow thereafter
